An explosive return to the library leaves the six Alexandrians lethally vulnerable to the terms of their recruitment, driving the fractured alliances to opposing strategies. While those who remain with the archives wrestle with the ethics of their astronomical abilities, an unlikely partnership seeks to influence politics on a global stage.

While each member of the erstwhile cohort does what it takes to secure their place on the board, the outside world mobilizes to destroy them, and the Caretaker himself, Atlas Blakely, may yet succeed with a plan foreseen to have world-ending stakes. It's a race to survive as the six Society recruits are faced with the question of what they're willing to betray for limitless power—and who will be destroyed along the way.

In modern-day Manhattan where we lay our scene, two rival witch families fight to maintain control of their respective criminal empires.

On one side of the conflict are the Antonova sisters — each one beautiful, cunning, and ruthless — and their mother, the elusive supplier of premium intoxicants, known only as Baba Yaga. On the other side, the influential Fedorov brothers serve their father, the crime boss known as Koschei the Deathless, whose community extortion ventures dominate the shadows of magical Manhattan.

After twelve years of tenuous co-existence, a change in one family's interests causes a rift in the existing stalemate. When bad blood brings both families to the precipice of disaster, fate intervenes with a chance encounter, and in the aftershocks of a resurrected conflict, everyone must choose a side. As each of the siblings struggles to stake their claim, fraying loyalties threaten to rot each side from the inside out.

We took the technology they left behind, and rapidly built ourselves into a starfaring civilization. Because we haven't got a moment to lose. Because it's clear that there are even more powerful, more hostile aliens out there, and Earth needs allies.

But it also transpires that the Shongairi expedition that nearly destroyed our home planet ... *wasn't* an official one. That, indeed, its commander may have been acting as an unwitting cats-paw for the Founders, the ancient alliance of very old, very evil aliens who run the Hegemony that dominates our galaxy, and who hold the Shongairi, as they hold most non-Founder species, in not-so-benign contempt.

Leslie Bruin is assigned to the backwoods township of Spar Creek by the Frontier Nursing Service under its usual mandate: vaccinate the flock, birth babies, and weather the judgements of churchy locals who look at him and see a failed woman. Forged in the fires of the Western Front and reborn in the cafes of Paris, Leslie believes he can handle whatever is thrown at him—but Spar Creek holds a darkness beyond his nightmares.

Something ugly festers within the local congregation, and its malice has focused on a young person they insist is an unruly tomboy who must be brought to heel. Violence is bubbling when Leslie arrives, ready to spill over, and he'll have to act fast if he intends to be of use. But the hills enfolding Spar Creek have a mind of their own, and the woods are haunted in ways Leslie does not understand.

Two Worlds. Two Minds. One Life.

There are two Earths. Perfectly ordinary and existing in parallel. There are no doorways between them, no way to cross from one world to another. Unless you're a shifter.

Canna and Lily are the same person but they refuse to admit it. Their split psyche has forced them to shift randomly between worlds – between lives and between families – for far longer than they should. But one mind can't bear this much life. It'll break under the weight of it all. Soon they'll experience their final shift and settle at last in one world, but how can they prepare both families for the eventuality of them disappearing forever?

Twice Lived is a novel about family and friendships, and about loss and acceptance, and about the ways we learn to deal with the sheer randomness of life.

Anna has only two rules for the annual Pace family destination vacations: *Tread lightly, and survive.*

It isn't easy, when she's the only one in the family who doesn't quite seem to fit. Her twin brother Bennie goes with the flow so much he's practically dissolved, and her older sister Nicole is so used to everyone—including her blandly docile husband and two kids—falling in line that Anna often ends up in trouble for simply asking a question. Mom is baffled in general by her life choices (why get all those art degrees only to work in an ad agency?), and Dad, well—he just wants a little peace and quiet.

The gorgeous, remote villa in the tiny medieval town of Monteperso seems like a perfect place to endure so much family time—not to mention Bennie's demanding new boyfriend (it's Christopher, *not* Chris). That is, until things start going off the rails—the strange noises at night, the unsettling warnings from the local villagers, and oh, and the dark, violent past of the villa itself

Space exploration can be lonely and isolating.

Psychologist Dr. Ophelia Bray has dedicated her life to the study and prevention of ERS—a space-based condition most famous for a case that resulted in the brutal murders of twenty-nine people. When she's assigned to a small exploration crew, she's eager to make a difference. But as they begin to establish residency on an abandoned planet, it becomes clear that crew is hiding something.

While Ophelia focuses on her new role, her crewmates are far more interested in investigating the eerie, ancient planet and unraveling the mystery behind the previous colonizer's hasty departure than opening up to her.

That is, until their pilot is discovered gruesomely murdered. Is this Ophelia's worst nightmare starting—a wave of violence and mental deterioration from ERS? Or is it something more sinister?

After their terrifying ordeal at the Usher manor, Alex Easton feels as if they just survived another war. All they crave is rest, routine, and sunshine, but instead, as a favor to Angus and Miss Potter, they find themselves heading to their family hunting lodge, deep in the cold, damp forests of their home country, Gallacia.

In theory, one can find relaxation in even the coldest and dampest of Gallacian autumns, but when Easton arrives, they find the caretaker dead, the lodge in disarray, and the grounds troubled by a strange, uncanny silence. The villagers whisper that a breath-stealing monster from folklore has taken up residence in Easton's home. Easton knows better than to put too much stock in local superstitions, but they can tell that something is not quite right in their home. . . or in their dreams.

Only the extraordinary are chosen. Only the cunning survive.

An explosive return to the library leaves the six Alexandrians lethally vulnerable to the terms of their recruitment, driving the fractured alliances to opposing strategies. While those who remain with the archives wrestle with the ethics of their astronomical abilities, an unlikely partnership seeks to influence politics on a global stage.

While each member of the erstwhile cohort does what it takes to secure their place on the board, the outside world mobilizes to destroy them, and the Caretaker himself, Atlas Blakely, may yet succeed with a plan foreseen to have world-ending stakes. It's a race to survive as the six Society recruits are faced with the question of what they're willing to betray for limitless power-and who will be destroyed along the way.
